Assignment Operators - Zero to Hero Questions List

May 26, 2026

1. Write a program to add a number to itself using `+=`. *(Hint: `a += a`)*
2. Write a program to subtract 5 from a number using `-=`. *(Hint: update the same variable)*
3. Write a program to multiply a number by 10 using `*=`. *(Hint: no normal * assignment)*
4. Write a program to divide a number by 2 using `/=`. *(Hint: integer division)*
5. Write a program to find remainder when divided by 3 using `%=`. *(Hint: modulus assignment)*
6. Swap two numbers using `+=` and `-=` only. *(Hint: avoid third variable)*
7. Increase salary by 15% using `+=`. *(Hint: calculate increment first)*
8. Reduce marks by 10 using `-=`. *(Hint: modify existing variable)*
9. Double a number repeatedly using `*=` inside a loop. *(Hint: powers of 2)*
10. Halve a number repeatedly using `/=` until it becomes 1. *(Hint: `while` loop)*
11. Find compound interest style growth using `*=`. *(Hint: multiply by growth factor repeatedly)*
12. Create a countdown program using `-=`. *(Hint: decrement by steps)*
13. Add all even numbers from 1 to 20 using `+=`. *(Hint: accumulator variable)*
14. Multiply all numbers from 1 to 5 using `*=`. *(Hint: factorial logic)*
15. Find sum of digits using `+=`. *(Hint: use `% 10` and `/ 10`)*
16. Reverse a number using assignment operators. *(Hint: update reverse variable)*
17. Store total shopping bill using repeated `+=`. *(Hint: multiple item prices)*
18. Reduce bank balance after withdrawals using `-=`. *(Hint: repeated deductions)*
19. Create a simple score counter for a game using `+=` and `-=`. *(Hint: win and penalty points)*
20. Convert seconds into remaining time using `/=` and `%=`. *(Hint: hours/minutes/seconds)*
21. Write a program to square a number using `*=`. *(Hint: copy original value first)*
22. Find cube of a number using repeated `*=`. *(Hint: multiply same number again)*
23. Use `%=` to keep a number within range 0–9. *(Hint: modulo operation)*
24. Increase array elements using `+=`. *(Hint: loop through array)*
25. Decrease temperature daily using `-=` in a loop. *(Hint: simulate cooling)*
26. Calculate total class attendance using `+=`. *(Hint: add attendance each day)*

27. Simulate population decrease using `-=` percentage. *(Hint: repeated updates)*
28. Simulate bacteria growth using `*=`. *(Hint: doubling each hour)*
29. Reduce file size using `/=` compression ratio. *(Hint: repeated compression)*
30. Write a calculator that uses assignment operators for updates. *(Hint: menu-driven program)*
31. Find running average using `+=`. *(Hint: cumulative sum)*
32. Update player health using `-=` after attacks. *(Hint: game logic)*
33. Increase player experience points using `+=`. *(Hint: multiple missions)*
34. Use `*=` to generate geometric progression. *(Hint: common ratio)*
35. Use `+=` to generate arithmetic progression. *(Hint: common difference)*
36. Create a wallet balance tracker using assignment operators. *(Hint: deposits and expenses)*
37. Find total rainfall for a week using `+=`. *(Hint: loop input)*
38. Write a program to repeatedly apply discounts using `-=`. *(Hint: percentage deduction)*
39. Write a program to repeatedly add bonus marks using `+=`. *(Hint: update same variable)*
40. Create a fuel consumption simulator using `-=`. *(Hint: fuel decreases per km)*
41. Use `%=` to cyclically rotate numbers between ranges. *(Hint: wrap-around logic)*
42. Create a simple interest accumulator using `+=`. *(Hint: yearly addition)*
43. Create a loan repayment simulator using `-=`. *(Hint: monthly EMI deduction)*
44. Multiply matrix elements by a constant using `*=`. *(Hint: nested loops)*
45. Divide all array elements by 2 using `/=`. *(Hint: loop traversal)*
46. Update inventory stock using `+=` and `-=`. *(Hint: add/remove items)*
47. Simulate elevator movement using `+=` and `-=`. *(Hint: floor counter)*
48. Create a step counter using `+=`. *(Hint: add daily steps)*
49. Write a program to calculate exponential growth using repeated `*=`. *(Hint: loop iterations)*
50. Create a mini banking system using all assignment operators. *(Hint: deposit, withdraw, interest, charges)*
