1 File Handling in C — Practice Questions (50 Questions with Hints Only)

The questions are arranged from **Beginner** → **Intermediate** → **Advanced**.

2 Beginner Level (1–15)

2.0.1 1. Create a text file and write “Hello, World!” into it.

Hint: Use `fopen()` with "w" mode and `fprintf()`.

2.0.2 2. Read the contents of a text file and display them.

Hint: Use "r" mode and `fgetc()` or `fgets()`.

2.0.3 3. Write your name, age, and city into a file.

Hint: Use `fprintf()`.

2.0.4 4. Read character by character from a file.

Hint: Use `fgetc()` until EOF.

2.0.5 5. Copy the contents of one file into another.

Hint: Read one character at a time and write it.

2.0.6 6. Append a new line to an existing file.

Hint: Open the file in "a" mode.

2.0.7 7. Count the number of characters in a file.

Hint: Increment a counter for every character read.

2.0.8 8. Count the number of words in a file.

Hint: Detect spaces, tabs, and newlines.

2.0.9 9. Count the number of lines in a file.

Hint: Count occurrences of '\n'.

2.0.10 10. Display the size of a file.

Hint: Use fseek(), ftell(), and rewind().

2.0.11 11. Read a file line by line.

Hint: Use fgets().

2.0.12 12. Write multiple lines entered by the user into a file.

Hint: Continue until a sentinel value is entered.

2.0.13 13. Check whether a file exists before opening it.

Hint: Verify the result of fopen().

2.0.14 14. Display the current file position.

Hint: Use ftell().

2.0.15 15. Move the file pointer to a specific position.

Hint: Use `fseek()`.

3 Intermediate Level (16–35)

3.0.1 16. Reverse the contents of a file.

Hint: Read all data first, then write in reverse order.

3.0.2 17. Convert all lowercase letters in a file to uppercase.

Hint: Use character conversion functions.

3.0.3 18. Convert all uppercase letters to lowercase.

Hint: Traverse every character.

3.0.4 19. Count vowels in a text file.

Hint: Check each alphabetic character.

3.0.5 20. Count digits, alphabets, and special characters separately.

Hint: Classify each character.

3.0.6 21. Merge two text files into a third file.

Hint: Copy one file after the other.

3.0.7 22. Compare two files for equality.

Hint: Compare character by character.

3.0.8 23. Find the longest line in a file.

Hint: Read one line at a time using `fgets()`.

3.0.9 24. Replace every occurrence of a character in a file.

Hint: Write modified contents to a temporary file.

3.0.10 25. Replace every occurrence of a word in a file.

Hint: Read line by line and perform string replacement.

3.0.11 26. Remove all blank lines from a file.

Hint: Skip empty lines while copying.

3.0.12 27. Remove all spaces from a file.

Hint: Ignore ' ' characters while writing.

3.0.13 28. Count the frequency of each character in a file.

Hint: Use an array of size 256.

3.0.14 29. Find the frequency of a particular word.

Hint: Tokenize the file contents.

3.0.15 30. Display the last N lines of a file.

Hint: Store lines or traverse twice.

3.0.16 31. Read integers from a file and calculate their sum.

Hint: Use `fscanf()`.

3.0.17 32. Read floating-point numbers from a file and find their average.

Hint: Count the numbers while summing.

3.0.18 33. Store student details in a text file.

Hint: Use formatted output.

3.0.19 34. Read student details from a text file.

Hint: Use formatted input.

3.0.20 35. Search for a student by roll number in a file.

Hint: Read records one by one.

4 Binary Files (36–45)

4.0.1 36. Write integers into a binary file.

Hint: Use `fwrite()`.

4.0.2 37. Read integers from a binary file.

Hint: Use `fread()`.

4.0.3 38. Store student records in a binary file.

Hint: Write entire structures.

4.0.4 39. Read student records from a binary file.

Hint: Read structures using `fread()`.

4.0.5 40. Search for a record in a binary file.

Hint: Compare the key field.

4.0.6 41. Update a student's marks in a binary file.

Hint: Use `fseek()` to overwrite the record.

4.0.7 42. Delete a record from a binary file.

Hint: Copy all records except the target to a new file.

4.0.8 43. Append a new structure record to a binary file.

Hint: Open in "ab" mode.

4.0.9 44. Count the number of records in a binary file.

Hint: Use file size divided by structure size.

4.0.10 45. Sort records stored in a binary file.

Hint: Read into memory, sort, and write back.

5 Advanced Level (46–50)

5.0.1 46. Build a Student Record Management System using file handling.

Hint: Implement:

- Add
 - Display
 - Search
 - Update
 - Delete
-

5.0.2 47. Build an Employee Payroll System using files.

Hint: Store employee records permanently and calculate salaries.

5.0.3 48. Build a Library Management System using files.

Hint: Store book records and implement issue/return functionality.

5.0.4 49. Build a Banking System using file handling.

Hint: Implement:

- Create Account

- Deposit
 - Withdraw
 - Balance Inquiry
 - Transaction History
-

5.0.5 50. Build a Mini Database Management System using binary files.

Hint: Divide the program into functions such as:

- Create Database
- Insert Record
- Display Records
- Search Record
- Update Record
- Delete Record
- Sort Records
- Backup Database
- Restore Database
- Exit
